Target version:	Version 2.1	Spent time:	0.00 hour
Component:			
Description When registering a new user, if a space is wrongly included before or after the e-mail entered by the user (copy and paste for example), the system won't be able to send the message because it'll be considered an invalid message. So, the system must remove all blank spaces around the e-mail (trim it), in order to avoid user errors.
