

eTB Manager - Bug #1543

[Tasks from Mauricio TO-DO List] Create auto-calculated field: Treatment Category

06/04/2015 04:34 PM - Maurício Dos Santos

Status:	Rejected	Start date:	06/04/2015
Priority:	Normal	Due date:	
Assignee:	Maurício Dos Santos	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Component:			
Description Include new field "Treatment category" as the first popping-up when users start treatment with options (drop-down): <ul style="list-style-type: none">- Initial regimen with first-line drugs- Retreatment regimen with first-line drugs- Second-line treatment regimen Conditions: <ul style="list-style-type: none">- Initial regimen with first-line drugs - cases with registration group as "New" or "Treatment History Unknown" prescribed only with first line drugs.- Retreatment regimen with first-line drugs - cases with registration group different than "New" or "Treatment History Unknown" prescribed only with first line drugs.- Second-line treatment regimen - Any case with at least one second line drug prescribed. General Rule: This calculation has to be done only when the treatment starts, if the treatment is modified this field doesn't need to be recalculated. The cases already registered has to be updated.
