Description Check File Attached. For the columns Smear Positive and Smear Negative a new filed will be created and it will be an auto calculated field. The logic is being defined, the last idea was: The first microscopy exam registered from 7 days before the end date of intensive phase to 7 days after the end date of intensive phase. Ex: consider a case that the intensive phase ends at 2nd June 2015. So I should consider the first microscopy exam registered from 25th May 2015 to 9th June 2015. If the exam selected is positive the case is a Smear Positive case, if not, it is a Smear Negative case Waiting Taleb confirmation for the rule above.
