Description When changing parameters Reference date, Lead time, Forecasting period, Months of buffer stock, Min months of stock and Max months of stock all tabs must be disabled (get grey). This must work the same way as currently happens when change cases number, stocks or getting error messages trying to save or execute the file.

Still not working (i.e., tabs don't turn grey) when:

- Change the number of cases and stocks (on hand and on order) directly typing, editing or pasting in the cells. It only works if use the check box "disable".
- Changing regimens (adding or deleting) using the "Select treatment regimens" button.

It is working when pasting cases using the "Paste data" button, however still not working when pasting using "Ctrl V" keyboard for both enrolled and expected cases.

Please correct.
