1. Numbering system for dossier applications to be changed to year-serial number e.g 2007-2234 (removed NMRC)
2. The screening serial number should start with S for Screening, followed by screening year (e.g. 16) then forward slash (/) then serial numbers starting from 001
3. Change registration number format to YY/Pharmacological classification/sequence number (4 digits) NMRC to consider adding full date to registration number (probability of shifting pharmacological classification to ATC code). System to enable addition of ATC classification
