| **Target version:** | Version 1.0 | **Spent time:** | 0.00 hour |

**Description**

Release of the first version of the quantification tool, in a format possible to be installed in the local computer of the user for testing purposes.

Ideally, the following procedures may be done (*but may chang if better approachs come*):

- 1. Create a **run.bat** file that will allow user to execute the application (another possibility is to create a quantb.exe file wrapping the jar execution);
- 2. Pack all files in a zip file;
- 3. Upload the package by FTP to **ftp.etbmanager.org** in order to make it available as a downloadable link in www.etbmanager.org/download
- 4. Create a **Wiki** page with quick instructions on how to download and install

**History**

**#1 - 02/17/2013 04:24 PM - Oleksii Kurasov**
