I'm moving this issue to version 2 of QuanTB.

Internally in MSH it's ok to keep it as a zip file, but for regular distribution outside of MSH is important to have an installer in .exe format.

This installer will primarily:

1. Open a wizard to select installation folder and show copyright and ULA information;
2. Create a laucher icon in the desktop screen;
3. Assign (if possible) all files with .qtb extension to QuanTB;
