**Description**

Today, when the user wants to open or save a forecasting document, the system displays the "data" folder as default.

The problem is that the "data" folder also contains specific QuanTB files (like the data dictionary).

It'd be better to create a folder "docs" under the forecasting main folder and make it the default folder to save and load forecasting documents.

Keep the "data" folder to specific QuanTB files

## History

**#1 - 04/18/2013 12:23 PM - Oleksii Kurasov**

*- Due date set to 04/18/2013*

*- Status changed from New to Resolved*

*- Assignee changed from Oleksii Kurasov to Ricardo Memoria*

**#2 - 04/22/2013 10:16 AM - Ricardo Memoria**

Tested and properly implemented.

**#3 - 04/22/2013 10:16 AM - Ricardo Memoria**

*- Status changed from Resolved to Closed*
