As recommended by Java community, made application font size inependent from system settings. Now it always Tahoma 12. This approach uses Microsoft itself. see Skype for example or MS Office programs. It is hardly to achive compromiss for any font size and proper screen layout. For people with disabilities, Microsoft recomend to use Screen Magnificient Glass (standard system program)

#3 - 04/24/2013 07:10 PM - Luis Gustavo do Valle Bastos

- Status changed from Resolved to Closed

Adequate.
