Target version:	Version 2.1	Spent time:	0.00 hour
Component:	Administration		

Description

For evaluating purposes, it's important to know how many users logged into the system in a specific date.

The "User session history" report displays the list of the users, but it doesn't display the number of users (which is easier than manually row by row).

So it's requested to include the number of users displayed at the top of the table.
