For Single Drugs:

Validation checking for same name and different medicine, or same name, same medicine but different information for units/day, duration and days/week don't work and related warning message has not been displayed.

But, it is working properly for same name, same medicine and same information for units/day, duration and days/week (displaying error message). Also working properly for different name, same medicine and same information for units/day, duration and days/week (displaying warning message).
