Target version:	Version 2.1	Spent time:	0.00 hour
Component:			
Description Every page that contains a laboratory and TB unit selection field requires either a CONVERSATION or SESSION scope.			
PROBLEM: Because conversation scope is created so often, the user session takes a lot of RAM memory to store temporary information. In Ukraine, for 150 users, the system consumes up to 6Gb of RAM.			
SOLUTION: Change the way the administrative unit of the lab/unit is stored in the system (now just an Integer value is stored in session scope);

CHANGES IN THE FORMS

Exam forms:

In exam*.pages.xml, remove the lines

```
<restrict>#{caseHome.canEditExams}</restrict>
<begin-conversation join="true"/>
```

and replace by:

```
<action execute="#{examXXXHome.initializeForm}"/>
```

also, remove all

```
<end-conversation>
```

declarations

#2 - 11/07/2013 03:15 PM - Ricardo Memoria

- *Status changed from New to Resolved*

Implemented and available in dev server

#3 - 12/12/2013 08:19 AM - Ricardo Memoria

- *Status changed from Resolved to Closed*

available in production already
