Target version:		Spent time:	0.00 hour
Description Create the following 3 tags to bangladesh after daily update is implemented... Cases without culture results by over than 120 days - If the last culture exam has more than 120 days. select * from tbcase a where a.state in (0,1,2) and exists(select * from examculture ecu where ecu.datecollected = (select max(ecu2.datecollected) from examculture ecu2 where ecu2.case_id = ecu.case_id) and (DATE_ADD(ecu.datecollected, INTERVAL 120 DAY)) <= curdate() and a.id = ecu.case_id); Cases without microscopy results by over than 60 days - If the last microscopy exam has more than 60 days until today select * from tbcase a where a.state in (1,2) and exists(select * from exammicroscopy em where em.datecollected = (select max(em2.datecollected) from exammicroscopy em2 where em2.case_id = em.case_id) and (DATE_ADD(em.datecollected, INTERVAL 60 DAY)) <= curdate() and a.id = em.case_id); Cases without outcome by the end of treatment - Cases that the treatment end date is before today. select * from tbcase a where a.state < 3 and a.endtreatmentdate > curdate());			

History

- Status changed from Feedback to In Progress

#5 - 02/11/2014 03:39 PM - Maurício Dos Santos

The 3 tags are being daily updated and are functional... But the time that is being displayed as the execution time of the daily update is not right. Apparently the tags are being updated at the wrong time and the Time zone converting is not working properly.

A talk with Ricardo is needed.

#6 - 03/02/2014 12:36 PM - Maurício Dos Santos

Tags were being updated at 20:17, there were a mistake on the taskscheduler code, not it is ok!

Now I will just wait for bangladesh server to be updated and check if it is being executed at the right time.
