

Quantification tool - Bug #991

Data entered/changed on adjustment, pack size and pack price disappear from order tab when execute the forecasting

12/10/2013 12:06 PM - Luis Gustavo do Valle Bastos

Status:	Closed	Start date:	12/10/2013
Priority:	Normal	Due date:	01/10/2014
Assignee:	Luis Gustavo do Valle Bastos	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Version 1.0.2	Spent time:	0.00 hour
Description <ul style="list-style-type: none">- Entering information on adjustment, pack size and pack price columns at the order tab and not saving the forecasting, and then making changes in the parameters tab and clicking execute, the data on adjustment, pack size and pack price columns disappear. Should be correct to keep the data entered and use it in forecasting calculations.- Changing existing data on adjustment, pack size and pack price columns at the order tab in a saved forecasting and then executing the forecasting (even without making changes in the parameters), these data move back to the original one. Should be correct to keep the new data entered and use it in forecasting calculations.
